

imuno – The Solution®

What is imuno - The Solution®?

- **imuno™** is a revolutionary immune support formula with a patented component which is twice as effective as comparable formulas.
- **imuno™** is finely filtered, powerful, & pure. It has the ability to get into deeply hidden congestion and move it out **in its entirety**.
- **imuno™** is a micro-sized, blended molecule of vegan chondroitin sulfate, a precursor of acetylcholine, and Vit D for brain & gut.
- **Imuno™** was designed by quantum molecular biologist and immunotherapist Dr. Marco Ruggiero, MD, Ph.D., from Florence, Italy
- Dr. Ruggiero recommends combining **imuno™**, Bravo Yogurt and a ketogenic diet to get set for success.

imuno - The Solution® - Guidelines:

Transport: room temperature, protected from light

Store: refrigerated or cool, dark, dry.

Once opened: store refrigerated (<46 °F or < 8 °C) and closed.

Expiration:

If using the oral adapter

(membrane wide open) then the contents will last about 60 days.

If a sterile needled syringe is used

(membrane intact, contents sterile) then use contents within 24 weeks which is 6 months.

imuno - The Solution® - Dosage Recommendations:

Note: Chondroitin Sulfate has a blood thinning effect similar to heparin, so when taking larger doses, people on anticoagulant drugs are advised to be under medical supervision.

Each Vial Contains: 3ml, which equals 15 x 0.2ml servings. We count about 250 drops from a syringe in each vial

Adult Serving Size: 0.2 ml (4 drops) daily. (maximum dose 0.5 ml daily)

Child Serving Size: 0.1 ml (2 drops) once a week. (maximum dose 0.25 ml daily)

Administration

Shake well to homogenize the emulsion. Product separation is typical and not considered to be a quality defect.

Quick Start

- Shake before using & refrigerate when open
- Extract each use with a sterile needle syringe so the jar will last for 6 months after opening
- **Imuno™** is a sterile injectable solution. It can also be applied topically, sublingually, or with a nebulizer for systemic issues.
- Start slowly to make sure detox pathways are open. At first, take 1-3 drops 1x per week. Work up to your dose! More is not better.
- When your dose is sufficient, the product provides a lift.
- Uncomfortable detox is rare. Reduce or spread out doses & take more protein.

imuno - The Solution® - Application Methods

“Needleless” Syringe - under the tongue

Product is sterile and may be administered orally.

Keep in the mouth for at least 2 minutes to support absorption by the oral mucosa. Then swallow. The bioavailability of imuno™ is increased by digestion.

Do NOT drink or eat for at least 30 minutes after taking.

Spray Bottle - absorbed by the mucosa

Optional nasal/oral spray bottles are available at the local pharmacy.

Delivers approximately 0.1ml spray volume per pump.

Nebulization - absorbed into the lungs

Offers rapid ingestion into the blood supply for good results.

Purchase a nebulizer, needle syringes, and sterile saline solution from the pharmacy. Extract imuno™ with a needle syringe (leaves remaining vial contents sterile). Dissolve required dose of imuno™ in 3 to 5 ml of 0.9% Saline Solution in the nebulizer chamber. Our practitioners consider one sixth of a bottle/42 drops to be a dose. Nebulize and breathe it in through your mouth. Ongoing full and deep breathing will detoxify the blood through gas exchange.

How to Load the “Needleless” Syringe: 1 x vial adapter and 1 x 1 ml “needleless” syringe supplied as standard

1. Pry the plastic flip-top disk from the top of the vial.
2. Remove the vial adapter from the packaging and push it onto the top of the vial. The plastic spike will pierce the grey stopper visible in the centre of the metal top, and the adapter will clip into place.
3. Push the closed syringe firmly into the top of the vial adapter (depressing the blue rubber valve)
4. Invert the vial with syringe underneath and draw the syringe open to the required amount (i.e. 0.2 ml).
5. Turn the vial upright and remove the syringe from the vial adapter. The valve will close and seal the vial/adapter on syringe removal.
6. Use the required dose from the syringe.

Note: every division on the supplied 1ml oral syringe equals 0.02ml, with major divisions numbered at each 0.1ml.

Disclaimer: None of our products are intended to diagnose, treat, cure, or prevent any disease. Our products are chosen for their ability to support the body’s healthy immune system, and larger doses of supporting products may be required in times of stress. Just like more food is required when more exercise is undertaken. If you are under more stress, then please take up to the recommended maximum dose or the dose prescribed by your doctor.

imuno – The Solution®

imuno™ is the solution for beautiful skin

imuno – The Solution®

For Deep Shimmering Beautiful Skin in 4 Days!

Work with Nature:

Your skin is one of your largest detoxification organs, thus your body may move toxins to your skin for removal. Keep your skin clean and sweet by eating a ketogenic diet which can help keep the pathways pristine by not adding toxins. Your Bravo Yogurt is the key to this cleaning! Bravo also turns on the immune system in the cellular environment. There is nothing more natural than Bravo Yogurt, establishing a working immune system inside the layers of your skin! When it's working, it shimmers with vibrations like an ultrasonic jewelry cleaner or perhaps like a singing bowl.

Imuno™ gives your detoxification a super power. It's tiny vegan particles get into and move out any debris in your body leaving you clear and clean at any age. It is the perfect natural anti-aging that matches perfectly to your lifestyle of beauty.

Give yourself a treat by using your imuno™ and Bravo Yogurt protocols on your skin to create a shimmering strength and beauty that you will come to appreciate as your very own personal super power giving you extra senses to be safe, healthy, make good decisions and be more successful.

Directions for use:

1. Shake well to homogenize the imuno™ emulsion and take the drops out of your vial with a needle syringe.
2. Mix your standard dose of imuno™, which may be 4 drops, with an emollient base to make your own perfect lotion.
3. Or use a standard dose of Bravo Yogurt, 2 TBS, as an emollient lotion or buy our yew tip salve with drops of imuno™.
4. Apply it to the skin of your face, neck and ears topically using finger tips, a thin cotton pad, or sponge.
5. Massage the imuno™ Bravo mixture onto face and neck with a gentle patting motion.

Can you give it to the kids? The husband? Your nemesis? You bet!
Change your life for more health, new behavior & peace naturally with your immune system.
